

JOSH HOMAN, MS, BSN, RN

Elk Grove Village, IL | 847-340-4101 | joshdhoman@gmail.com

github.com/Joshdhoman | linkedin.com/in/josh-homan

PROFESSIONAL SUMMARY

Registered nurse with 12 years of experience in critical care and interhospital patient placement, and a Master of Science in Data Science. Combines firsthand knowledge of patient throughput, capacity constraints, and clinical workflows with skills in Python, SQL, R, and data visualization. Developed an independent analytics project using synthetic transfer-center data to examine transfer declines, model outcomes, and evaluate differences by payer.

TECHNICAL SKILLS

Analysis: Python, SQL, R, pandas, NumPy, scikit-learn, statistical testing, regression

Visualization: Tableau, Streamlit, Matplotlib, ggplot2

Data and tools: PostgreSQL, relational database design, Jupyter, Quarto, Git, GitHub

Clinical: Epic EMR, patient throughput, transfer coordination, patient placement, clinical workflow analysis

SELECTED ANALYTICS PROJECT

Transfer Center Decline Analysis and Prediction

Independent project | Synthetic data | Python, pandas, scikit-learn, Jupyter

- Analyzed the transfer-request funnel and demand patterns to examine where requests were declined within a simulated transfer-center workflow.
- Engineered features and developed a logistic regression model to predict transfer declines, using cost-weighted thresholds to explore tradeoffs between prediction errors.
- Examined differences in transfer outcomes by payer using chi-square testing and logistic regression.
- Connected the analysis to operational questions informed by clinical placement experience; findings describe synthetic data and do not establish actual hospital performance or payer inequity.

PROFESSIONAL EXPERIENCE

RN Clinical Placement Coordinator

Trinity Health | Maywood, IL | November 2018–Present

- Assess inbound transfer requests and coordinate patient placement across a multi-hospital system, matching patient acuity and required services with available beds.
- Use Epic to review clinical information and support placement decisions under changing capacity constraints.
- Coordinate with referring physicians and receiving clinical teams to resolve placement conflicts and communicate transfer requirements.
- Apply clinical judgment to competing placement demands involving acuity, service-line needs, and bed availability.

Registered Nurse, Bone Marrow Transplant Critical Care

Loyola University Medical Center | Maywood, IL | August 2014–October 2018

- Provided critical care for medically complex, immunocompromised patients in collaboration with interdisciplinary teams.
- Documented assessments, interventions, and patient responses in Epic to support continuity of care.
- Responded to clinical emergencies and mentored nursing students and new hires in safe care practices.

EDUCATION

Master of Science, Data Science

Eastern University | August 2026

Bachelor of Science, Nursing

Loyola University Chicago | May 2014

LICENSURE AND CERTIFICATIONS

Registered Nurse — Illinois

Google Data Analytics Professional Certificate — July 2024
